

Sophia Welcome Script — Ghaafeedi Music Landing Video

Total runtime: ~2 minutes | Voice: Sophia (ElevenLabs — Lily Velvety Actress
pFZP5JQG7iQjIQuC4Bku)

Tone: Confident, premium, warm. Measured pace. No rush.

SEGMENT 1 — ~20 seconds

"Hello. I'm Sophia."

"Your personal AI guide at Ghaafeedi Music."

"And I'm so glad you're here."

SEGMENT 2 — ~20 seconds

"Ghaafeedi Music is not a music streaming platform."

"It's something far more personal than that."

"We turn your real memories, your stories, your emotions —"

"into cinematic songs and films."

"Created just for you."

SEGMENT 3 — ~20 seconds

"A love you lost. A parent you miss."

"A chapter of your life that deserves to be remembered."

"We take what you share with me —"

"and we transform it into something you can hear, see, and feel."

"Forever."

SEGMENT 4 — ~20 seconds

"Our artists, our AI, and I —"

"work together to craft your emotional story"

"into a masterpiece that is entirely, uniquely yours."

"Songs written from your words."

"Films built from your memories."

SEGMENT 5 — ~20 seconds

"I'll be with you every step of the way."

"Guiding you. Listening to you."

"Making sure what we create together"

"feels exactly the way your story deserves to feel."

SEGMENT 6 — ~20 seconds

"This is your moment."

"Step inside Ghaafeedi Music —"

"and let's build something extraordinary together."

"I can't wait to hear your story."

NOTES FOR META.AI VIDEO CREATION

- Use the Sophia image (sophia-welcome-hero.png) as the base for all video segments
- Each segment = one video clip (approx 15-20 seconds)
- Request subtle animation: slight breathing, gentle body sway, soft particle glow in background
- No hard cuts — request smooth fade or dissolve between segments
- Background should stay deep space black with gold particle bokeh throughout
- Download all clips with NO audio — audio will be added separately via ElevenLabs

AUDIO PRODUCTION PLAN (post Meta.ai)

1. Generate full 2-min voiceover via ElevenLabs (voice ID: pFZP5JQG7iQjIQuC4Bku)
2. Layer under: soft orchestral ambient bed (low volume, ~15%)
3. Sync voiceover to video segments by timestamp
4. Composite final 2-min video
5. Replace existing Sophia entry flow on homepage with this video player (autoplay, muted on load, unmutes on interaction)
